

Minutes 12-05-23

Urja

Updates

- The GeoJSON parsing script produces a beam of light, in preparation to place a road.
 - This is her last meeting.
-

Jay

Not present.

Tasks

- Demo camera feature progress next week.
-

Chintan

Updates

- The GeoJSON parsing script produces a beam of light, in preparation to place a road.
- Will try to replace the beam with road prefabs.

Feedback

- When placing any prefabs, make sure that there is something to hold them (perhaps a plane) and make sure the materials are set so that they repel each other.

Tasks

- Verify GeoJSON has building information. If it doesn't, check .osm format (from OpenStreetMap).
 - Show progress next week.
-

Leo

Updates

- Still working on bringing a car prefab to the new project (found baking problems).
- Still working on the physics of the new project (blocked by the lack of a car prefab).

Feedback

Tasks

- Bring a car prefab to the new project.
- Bring realistic car physics to the new project.
