

Minutes 11-16-23

Urja, Chintan

Updates

- Worked on the script.
- Will use GeoJSON.

Feedback

- Be ready for migrating to a new project in HDRP.
- Try to deliver in 2 weeks, per planned, but inform if more time is needed.
- Don't forget to come up with ways to compare units in Unity to real life.

Tasks

- Develop the script.
-

Jay

Updates

- Met with Ayush last week.
- Learned of the problems Ayush faced.

- Is working on the camera component.

Feedback

- Check other Unity driving projects, maybe you can get inspiration from their scripts.
- Remember our camera is very particular, featuring a spherical field of view.

Tasks

- A deadline to demo the camera component.
 - Keep working on the camera component.
-

Leo

Updates

- We might have to migrate our efforts into a new project. Currently, we use URP, which is incompatible with HDRP.
- Made progress in the networking part, but might be unable to bring the karting project into HDRP.
- We'll need to get new assets and refactor some scripts if we move to a new project.

Feedback

Tasks

- Develop the project's baseline.

- Keep the team updated, will we use the current project and URP or migrate and use HDRP?
