

# Minutes 12-20-23

---

## Chintan

### Updates

- Still working on the road-making feature (making it an actual road instead of a light beam).
- Someone may be interested in joining the team.

### Feedback

- Consider the texture and materials of the road. It must be set so that car objects don't fall through.

### Tasks

- Test the road-making feature on an HDRP project.
  - Find a way to implement buildings.
- 

## Leo

### Updates

- Found a project with a realistic car and driving experience.
- Still working on making the physics more realistic.
- Will try to get more volunteers from Professor Tiomkin.

- We may not meet next week (will message).

## **Feedback**

## **Tasks**

- Try to recruit more volunteers.
- Try to bake the realistic car and driving experience into the current project.
